Subject: Chemical assessment training and PPRTV information
Attachments: Overview_Haz ID_DR_China_2018.pptx; TAMU VIBS lecture_Gibbons 3-25-19_final2.pptx; PfhPa Evidence Map-3-27-19.docx

Nice chatting with you last week....please do send the CV of your student!

Here are some examples of training course slides: The China set is multi-hour (74 slides) and the TAMU is a bit shorter (56 slides) and some slides could be cut to make it fit a 1-hour slot.

Here is a bit about the PPRTV program <https://www.epa.gov/pprtv/provisional-peer-reviewed-toxicity-values-pprtvs-assessments>, although the document structure is changing as we onboard systematic review into this product line. In brief, the front end identification and evaluation of the evidence is looking more like the PFHpA evidence map (attached) and the evidence integration and dose-response sections looks more like the draft PFBS https://www.epa.gov/sites/production/files/2018-11/documents/pfbs_public_comment_draft_toxicity_assessment_nov2018-508.pdf

Hope this isn't too confusing – please reach out if you have questions or what to chat again. -k
